

COS30002

Lab Report – Task 1 (4/3/2021)

Ryan Chessum 102564760

- Created Bitbucket repository
- Invited Tutor account to the repository
- Added Files from canvas to the repository
- Updated the readme to include my name and what the repository was for

The image shows two screenshots of a Bitbucket repository interface. The top screenshot displays the 'User and group access' settings for the repository 'COS30002 102564760'. It includes a notification about repository access changes, instructions on how to grant access, and a list of users with their permissions. The bottom screenshot shows the 'Source' view of the repository, displaying a list of files and a README.md file.

Repository settings: User and group access

User and group access

Repository access has changed
In order to improve user privacy, we have made changes to Bitbucket Cloud invitations. You must now enter an email address to add users who don't currently have access to this account.

Grant access to this repository by adding users and groups. You can find them by name if they already have access. If not, type a full email address to add an existing account or to invite a new user.
For a list of all users with access to any of your private repositories, see which users count towards your bill on the Users on plan page. [Learn more](#)
